INDEX TO VOL. XCIII. (B)

Address of President at Anniversary, 1921, 1.
Amphibian metamorphosis and internal secretions (Huxley and Hogben), 36.
Antiseptic action and chemical constitution (Browning and others), 329.
Arber (A.) On the Development and Morphology of the Leaves of Palms, 249.
Asplenium bulbiferum, irritability of fronds of (Prankerd), 143.

Bacterial variability, studies in (Walker), 54.
Bacteriolytic element in tissues and secretions (Fleming), 306.
Bainbridge (F. A.) Obituary notice of, xxiv.
Balls (W. L.) and Hancock (H. A.) Further Observations on Cell-wall Structure as seen in Cotton Hairs, 426.
Blood-platelets, behaviour in vitamin deficiency and after radiation, etc. (Cramer and others), 449.
Blood sera, absorption spectra and optical rotation of proteins of (Lewis), 178.
Bose (Sir J. C.) The Dia-heliotropic Attitude of Leaves as determined by Transmitted Nervous Excitation, 153.
Brady (G. S.) Obituary notice of, xx.
Bramwell (J. C.) and Hill (A. V.) The Velocity of the Pulse Wave in Man, 298.
Brown (A.) Obituary notice of, iii.
Browning (C. H.) and others. Relationships between Antiseptic Action and Chemical Constitution, with Special Reference to Compounds of the Pyridine, Quinoline, Acridine, and Phenazine Series, 329.

Campbell (J. A.) See Hill (L.) and others.
Cell-wall structure in cotton hairs (Balls and Hancock), 426.
Cholesterol in animal organism ——, autolysis of liver and spleen (Gardner and Fox), 486.
Ciliary movement, mechanism of (Gray), 104, 122.
Cohen (J. B.) See Browning and others.
Cotton hairs, cell-wall structure in (Balls and Hancock), 426.
Cramer (W.), Drew (A. H.), and Mottram (J. C.) Blood-platelets: their Behaviour in "Vitamin A" Deficiency and after "Radiation," and their relation to Bacterial Infections, 4 .
Currey (G.) The Colouring Matter of Red Roses, 194.

Depressor nerve rabbit (Sarkar), 230.
Devanesen (D.) The Development of the Calcareous Parts of the Lantern of Aristotle in *Echinus liaris*, 468.
Drew (A. H.) See Cramer and others.
Ducie (Earl of) Obituary notice of, i.

Echinoderm egg during fertilisation, etc., heat production and oxidation processes of (Shearer), 410.
Echinoderm egg, oxidation during fertilisation (Shearer), 213.
Echinus miliaris, development of lantern of Aristotle in (Devanesen), 468.

Fleming (A.) On a Remarkable Bacteriolytic Element found in Tissues and Secretions, 306.
Fox (F. W.) See Gardner and Fox.

Gardner (J. A.) and Fox (F. W.) The Origin and Destiny of Cholesterol in the Animal Organism. Part XIII.—On the Autolysis of Liver and Spleen, 486.
Gaunt (R.) See Browning and others.
Gelatine, titration curve of (Lloyd and Mayes), 69.
Graviperception of fern fronds (Prankerd), 143.
Gray (J.) The Mechanism of Ciliary Movement, 104, 122.
Gulbransen (R.) See Browning and others.

Hancock (H. A.) See Balls and Hancock.
Hargood-Ash (D.) See Hill (L.) and others.
Harris (D. T.) Active Hyperæmia, 384.
Heald (C. B.) and Tucker (W. S.) Recoil Curves as shown by the Hot-wire Microphone, 281.
Heating and cooling of body by local application of heat and cold (Hill and others), 207.
Hewitt (J. A.) See Pickering and Hewitt.
Hill (A. V.) See Bramwell and Hill.
Hill (L.), Hargood-Ash (D.) and Campbell (J. A.) On the Heating and Cooling of the Body by Local Application of Heat and Cold, 207.
Hill (L.), Vernon (H. M.) and Hargood-Ash (D.) The Kata-Thermometer as a Measure of Ventilation, 198.
Hjort (J.) Observations on the Distribution of Fat-soluble Vitamines in Marine Animals and Plants, 440.
Hogben (L. T.) and Winton (F. R.) The Pigmentary Effector System. I.—Reaction of Frog's Melanophores to Pituitary Extracts, 318.
Hogben (L. T.) See Huxley and Hogben.
Huxley (J. S.) and Hogben (L. T.) Experiments on Amphibian Metamorphosis and Pigment Responses in Relation to Internal Secretions, 36.
Hyperæmia, active (Harris), 384.

Kata-thermometer as measure of ventilation (Hill and others), 198.

Leaves, dia-heliotropic attitude of, determined by nervous excitation (Bose), 153.
Lewis (S. J.) The Ultra-violet Absorption Spectra and the Optical Rotation of the Proteins of Blood Sera, 178.
Lipschütz (A.) On the Hypertrophy of the Interstitial Cells in the Testicle of the Guinea-pig under different Experimental Conditions, 132.
Lloyd (D. J.) and Mayes (C.) . The Titration Curve of Gelatine, 69.

Mayes (C.) See Lloyd and Mayes.
Miall (L. C.) Obituary notice of, x.
Microphone, hot-wire, and recoil curves (Heald and Tucker), 281.
Mottram (J. C.) See Cramer and others.
Muscle, acidity during maintained contraction (Roaf), 406.

Obituary Notices :—

Ducie, Earl of, i.	Brady, G. S., xx.
Brown, A., iii.	Bainbridge, F. A., xxiv.
Miall, L. C., x.	Waller, A. D., xxvii.

Ovalbumin and albumin, optical rotatory power of (Young), 15.

Palms, development and morphology of leaves (Arber), 249.
Peptone, action on blood and immunity thereto (Pickering and Hewitt), 367.

Pickering (J. W.) and Hewitt (J. A.) The Action of "Peptone" on Blood and Immunity thereto, 367.
Pigmentary effector system (Hogben and Winton), 318.
Pituitary extracts, reaction of frog's melanophores to (Hogben and Winton), 318.
Ponder (E.) The Hæmolytic Action of Sodium Glycocholate, 86.
Prankerd (T. L.) On the Irritability of the Fronds of *Asplenium bulbiferum*, with special Reference to Graviperception, 143.
Protein, coagulation of, by sunlight (Young), 235.
Pulse wave in man, velocity of (Bramwell and Hill), 298.

Recoil curves shown by hot-wire microphone (Heald and Tucker), 281.
Roaf (H. E.) The Acidity of Muscle during Maintained Contraction, 406.
Roses, colouring matter of (Currey), 194.

Sarkar (B. B.) The Depressor Nerve of the Rabbit, 230.
Shearer (C.) On the Oxidation Processes of the Echinoderm Egg during Fertilisation, 213; —— On the Heat Production and Oxidation Processes of the Echinoderm Egg during Fertilisation and Early Development, 410.
Sherrington (Sir C.) Presidential Address, 1921, 1.
Sodium glycocholate, hæmolytic action of (Ponder), 86.
Stephenson (M.) and Whetham (M. D.) Studies in the Fat Metabolism of the Timothy Grass Bacillus, 262.

Testicle of Guinea-pig, hypertrophy of interstitial cells under different conditions (Lipschütz), 132.
Timothy grass bacillus, fat metabolism of (Stephenson and Whetham), 262.
Tucker (W. S.) See Heald and Tucker.

Ventilation, kata-thermometer as measure of (Hill and others), 198.
Vernon (H. M.) See Hill (L.) and others.
Vitamines, fat-soluble, distribution in marine animals and plants (Hjort), 440; effect of absence on blood-platelets (Cramer and others), 449.

Walker (E. W. A.) Studies in Bacterial Variability: On the Occurrence and Development of Dys-, Eu-, and Hyper-agglutinable Forms of Certain Bacteria, 54.
Waller (A. D.) Obituary notice of, xxvii.
Whetham (M. D.) See Stephenson and Whetham.
Winton (F. R.) See Hogben and Winton.

Young (E. G.) On the Optical Rotatory Power of Crystalline Ovalbumin and Serum Albumin, 15; —— The Coagulation of Protein by Sunlight, 235.

END OF THE NINETY-THIRD VOLUME (SERIES B).

HARRISON AND SONS, Ltd., Printers in Ordinary to His Majesty, St. Martin's Lane.
